

Desde 2006 Mayagüez solo ha obtenido 6 patentes.

	PUB. APP. NO.	Title
1	20130172552	Novel Small-Molecule Inhibitors of Rac1 in Metastatic Breast Cancer
2	20030152649	Anti-bacterial plant compositions
	PAT. NO.	Title
1	8,524,685	Anti-angiogenic therapeutics efficacy enhanced by nanoformulation
2	8,491,964	Diamond nucleation using polyethylene
3	8,440,973	Bimorph cantilever arrangement and applications thereof
4	8,440,166	Method of synthesizing a novel absorbent titanosilicate material (UPRM-5)
5	8,383,674	Synthesis of silver nanoclusters on zeolite substrates
6	8,268,628	Method for determination of protein, peptide or peptoid aggregation, stability, and viability and system using the same
7	8,185,982	Integrated showering and body support system
8	8,143,231	Method of reducing HIV-replication in human body tissue
9	8,104,358	High sensitivity passive wireless strain sensor
10	8,101,783	Titanium-maltol compound and method of synthesizing the same
11	7,887,860	Anti-bacterial plant compositions
12	7,807,137	Iron-based contrast agent
13	7,641,919	Anti-bacterial plant compositions
14	7,528,060	Branched nanostructures and method of synthesizing the same
15	7,427,654	Degradable polyimides
16	7,361,643	Methods for inhibiting angiogenesis
17	7,160,575	Conducting polymer
18	7,157,144	Giant remnant polarization in laser ablated SrBi.sub.2Nb.sub.2O.sub.9 thin films on Pt/TiO.sub.2/SiO.sub.2/Si substrates
19	7,081,371	Fabrication of stable, wide-bandgap thin films of Mg, Zn and O
20	7,052,677	Substituted octanuclear pyrazolato clusters with electron transfer and MRI contrast agent properties
21	6,799,464	Macroscopic model of scanning force microscope
22	6,644,137	Sample probe
23	6,608,205	Organic crystalline films for optical applications and related methods of fabrication

24	6,596,259	Metal based cubane structure contained in an octanuclear complex stable over several oxidation states and a method of producing the same
25	6,539,738	Compact solar-powered air conditioning systems
26	6,536,677	Automation and control of solar air conditioning systems
27	6,534,134	Apparatus and method for pulsed laser deposition of materials on wires and pipes
28	6,533,304	Mechanically assisted standing wheelchair
29	6,489,357	Tobacco cembranoids block the expression of the behavioral sensitization to nicotine and inhibit neuronal acetylcholine receptors
30	6,452,170	Scanning force microscope to determine interaction forces with high-frequency cantilever
31	6,267,911	Phosphors with long-persistent green phosphorescence
32	6,231,920	Electroanalytical applications of screen-printable surfactant-induced sol-gel graphite composites
33	6,227,981	Ball ramp assembly
34	6,198,530	Organic crystalline films for optical applications and related methods of fabrication
35	6,171,198	Merry-go-round for wheel chairs
36	6,170,202	Building system using shape memory alloy members
37	6,117,362	Long-persistence blue phosphors
38	5,746,823	Organic crystalline films for optical applications and related methods of fabrication
39	5,557,471	Lens for depositing target material on a substrate
40	5,475,228	Unipolar blocking method and apparatus for monitoring electrically charged particles
41	5,470,572	Non-infectious simian immunodeficiency virus particles produced by cell line CRL 11393
42	5,468,500	Soursop flavor
43	5,405,659	Method and apparatus for removing material from a target by use of a ring-shaped elliptical laser beam and depositing the material onto a substrate
44	5,274,689	Tunable gamma ray source
45	5,059,294	Method for separating nucleic acids and nucleic acid probes
